

# VIPER GUN SYSTEMS-30MM (VGS-30)

## MANNED MEDIUM CALIBER LETHALITY

see the Viper Gun System-30MM in action 

### KEY FEATURES

Innovative VIPER Weapon mount system provides air, sea, and ground platforms a unique capability to use various weapons in "manned" mode of operation that is both simple to use and cost effective vs. "unmanned" alternatives.

Mechanically stabilized, Crew Served Weapons Mount with patented Gun Mount Braking System (GMBS™).

Greater Reach (30mm/3000m; 50 cal/2000m; 7.62mm/1800m).

Scalable lethality with quick weapons change out. Accepts 30mm M230LF, 20mm, 40mm AGL, & .50 Caliber weapons.

Standard turret ring, and naval deck, bolt patterns available for easy mounting on vehicles and naval vessels.

Self contained package. No turret modifications required.

24VDC Integrated Power. No vehicle power required (although can be used).

Improved Accuracy and Increased Lethality.

Less Weight and Maintenance.

Picatunny Rails to accept variety of optics packages.

### SPECIFICATIONS

Weight 170-260lbs (77-118kg)  
 Max Elevation 60 Degrees  
 Max Depression 18 Degrees
